Projects:

ShareEzy - Peer-to-Peer File Sharing Platform

[GitHub](#)

React.js, Tailwind CSS, WebRTC, Socket.IO, Node.js

[Live](#)

- Developed a real-time peer-to-peer file sharing platform enabling secure device-to-device transfers without Storing on Server.
- Implemented WebRTC communication and Socket.IO signaling for room management and peer connection establishment.
- Built chunk-based file transfer functionality for handling large file transfers efficiently.
- Designed a responsive user interface optimized for desktop and mobile devices.

Mentorise - A Mentor Mentee Connecting Platform

[GitHub](#)

HTML, Tailwind CSS, Javascript, Node.js, Express.js, Firebase Db and Auth, Socket.IO, Gemini API

[Live](#)

- Developed a platform connecting students with mentors of their college for guidance.
- Implemented real-time communication using Socket.IO.
- Implemented session booking service.
- Integrated Firebase Authentication and database services for secure user management.

YojanaGPT - A Government Scheme Website Assistant Chrome Extension

[GitHub](#)

HTML, CSS, Javascript, Local Ollama Model, Chrome APIs

- Developed a Chrome extension that provides real-time summaries of government scheme webpages, enhancing accessibility and user experience through DOM manipulation by script injection.
- Integrated a locally hosted Ollama LLM for real-time webpage summarization.

Certifications and Achievements :

- Certificate of Completion — Artificial Intelligence Internship, Edunet Foundation (6 weeks).
- 1st Runner-Up, “Reimagine” Hackathon (Team Lead).
